# **E' nelle tue mani prevenire la sepsi correlata al'assistenza sanitaria**

**Sintesi del documento originale disponibile sul sito gestione del rischio**

*Ogni anno la campagna OMS **"SALVA LE VITE: PULISCI LE TUE MANI"** mira a mantenere un profilo globale sull'importanza dell'igiene delle mani in ambito sanitario e a "unire le persone" a supporto del miglioramento dell'igiene delle mani nel mondo.*

**La campagna globale annuale  
sull'igiene delle mani  
5 maggio**

World Health  
Organization

# L'UNITÀ GLOBALE OMS PER LA PREVENZIONE E IL CONTROLLO DELLE INFEZIONI GUIDA LA CAMPAGNA PER L'IGIENE DELLE MANI

*Proteggere le vite dei pazienti e degli operatori nel mondo attraverso l'eccellenza nel campo della prevenzione e controllo delle infezioni*

**ASSISTENZA  
SANITARIA SENZA  
INFEZIONI  
EVITABILI**

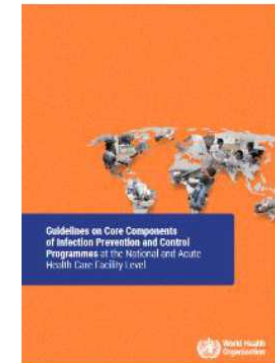

**Opera in collaborazione con il centro OMS sulla sicurezza del paziente degli ospedali universitari di Ginevra**

# L'IGIENE DELLE MANI E' AL CENTRO DI UN EFFICACE PROGRAMMA DI PREVENZIONE E CONTROLLO DELLE INFEZIONI (IPC)

*(Infection Prevention Control – prevenzione e controllo infezioni)*

Basandosi sulle linee guida OMS si indica il link per potenziare i programmi di IPC  
<http://www.who.int/infection-prevention/publications/ipc-components-guidelines/en/>

L'igiene delle mani rappresenta il core di un efficace programma di IPC; la campagna annuale del 5 Maggio riveste un'importanza chiave per migliorare i comportamenti rispetto alle buone pratiche di IPC.

World Health Organization | Patient Safety

World Health Organization | Patient Safety

World Health  
Organization

L'OMS ha già collegato la campagna a istanze più ampie (IPC e salute globale). I collegamenti sono importanti per accrescere l'importanza dell'igiene delle mani.

# 70° Assemblea mondiale OMS 2017 "Migliorare la prevenzione, diagnosi e gestione clinica della sepsi"

**SEPSI** *"La sepsi è una disfunzione d'organo potenzialmente fatale causata da una sregolata risposta dell'ospite ad un'infezione".*

Colpisce più di **30 milioni** di persone nel mondo ogni anno

La 70° Assemblea mondiale OMS ha adottato una risoluzione sulla sepsi nel 2017

Le priorità per affrontare il problema della sepsi:

- Rafforzare la prevenzione (incluso l'assistenza sanitaria)
- Aumentare la consapevolezza / attenzione al problema sepsi

SEVENTIETH WORLD HEALTH ASSEMBLY

WHA70.7

Agenda item 12.2

29 May 2017

## Improving the prevention, diagnosis and clinical management of sepsis

The Seventieth World Health Assembly,

Having considered the report on improving the prevention, diagnosis and clinical management of sepsis;

Concerned that sepsis continues to cause approximately six million deaths worldwide every year, most of which are preventable;

Recognizing that sepsis as a syndromic response to infection is the final common pathway to death from most infectious diseases worldwide;

### Sepsis

#### Improving the prevention, diagnosis and clinical management of sepsis

Sepsis arises when the body's response to an infection injures its own tissues and organs. If not recognized early and managed promptly it can lead to septic shock, multiple organ failure and death. It is a serious complication of infection in all age groups and particularly in patients with underlying conditions. It represents a major cause of national and neonatal morbidity and mortality.

### SAVE LIVES: Clean Your Hands 5 May 2018

#### It's in your hands – prevent sepsis in health care

WHO calls on health facilities to prevent health care-associated sepsis through hand hygiene and infection prevention and control (IPC) action. Sepsis is estimated to affect more than 30 million patients every year worldwide. At the Seventieth World Health Assembly in May 2017, Member States adopted a resolution on improving the prevention, diagnosis and treatment of sepsis.

#### [More information about sepsis](#)

Health care-associated infections, infections acquired during health care delivery, are common and are a risk factor for developing sepsis but we can prevent this. Effective hand hygiene plays a key role. On world hand hygiene day (5 May), the focus for everyone should be on prevention of health care-associated sepsis.

#### 5 May 2018 calls to action

- **Health workers:** "Take 5 Moments to clean your hands to prevent sepsis in health care."
- **IPC leaders:** "Be a champion in promoting hand hygiene to prevent sepsis in health care."
- **Health facility leaders:** "Prevent sepsis in health care, make hand hygiene a quality indicator in your hospital."
- **Ministries of health:** "Implement the 2017 WHA sepsis resolution. Make hand hygiene a national marker of health care quality."
- **Patient advocacy groups:** "Ask for 5 Moments of clean hands to prevent sepsis in health care."

# Infografica campagna OMS 2018 - traduzione

Come prevenire la sepsi. Il ruolo che potete avere a livello di strutture sanitarie e di comunità

World Health Organization

## How to prevent sepsis

The role you can play in health care and communities

#sepsis #handigiene

**What is sepsis?**

Malattia potenzialmente fatale  
life-threatening illness

Danneggia tessuti e organi  
injures tissues and organs

La sepsi insorge quando un'infezione altera la normale risposta corporea causando danni ai tessuti e agli organi

**OGNI ANNO LA SEPSI COLPISCE:**

- 30 million people worldwide
- 3 million newborns
- 30 milioni di persone nel mondo
- 3 milioni di neonati
- 1.2 million children
- can kill 6 million people
- 1.2 milioni di bambini
- Può uccidere 6 milioni di persone
- kills up to 500 000 newborns
- causes 1 in 10 maternal deaths
- Uccide fino a 500.000 neonati
- Ogni 10 morti materne 1 è causata dalla sepsi

**CHI E' A RISCHIO?**

Chiunque abbia un'infezione può sviluppare una sepsi, ma alcuni sono più a rischio di altri

- PREGNANT WOMEN: Donne gravide
- NEONATES: Neonati
- THE ELDERLY: Persone anziane
- THE IMMUNOSUPPRESSED: Persone immunodepresse
- PATIENTS WITH CHRONIC DISEASES: Pazienti con malattie croniche
- HOSPITALIZED PATIENTS: Pazienti ospedalizzati

Come e dove possiamo prevenire la sepsi? La sepsi può essere prevenuta

World Health Organization

Sepsis can be prevented by

Prevenendo le infezioni

Prevenendo l'evoluzione delle infezioni a sepsi

Le principali modalità per prevenire le infezioni sono:

COMMUNITY

HEALTH CARE

**Good hygiene**

↓ 40% DIARRHOEA

**Safe water and sanitation**

↓ 10% GLOBAL DISEASE BURDEN

**Safe food preparation and good nutrition**

↓ 50% DIARRHOEA

↓ 30% RESPIRATORY INFECTIONS IN CHILDREN

**Vaccinations**

Prevent 2-3 million deaths every year

**Practicing the 5 Moments for hand hygiene**

↓ 50% INFECTION

**A clean, well-functioning environment and equipment**

**Safe water and sanitation**

**Infection prevention and control programmes and teams**

↓ 30% INFECTION

**Infection prevention measures**

**L'evoluzione da un'infezione alla sepsi può essere prevenuta da:**

Pronto riconoscimento di segni e sintomi

Tempestiva richiesta di intervento sanitario

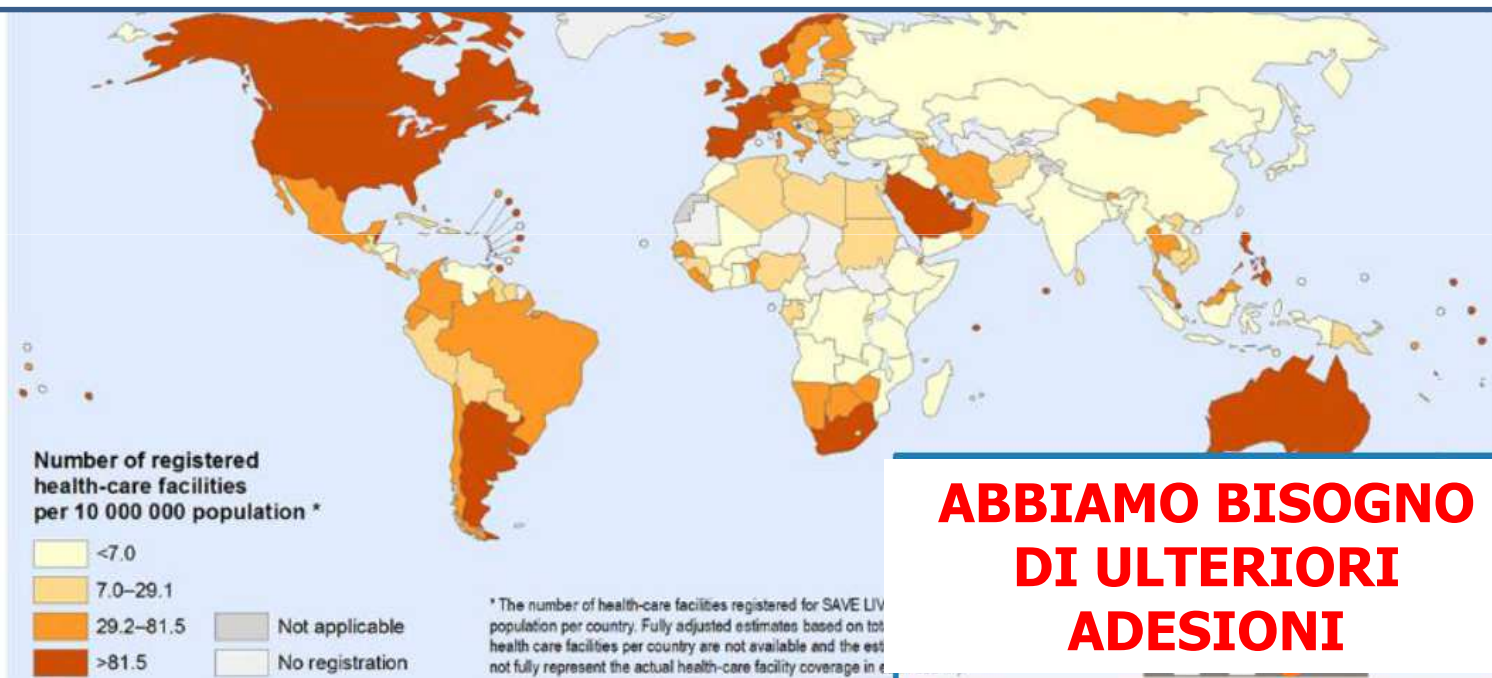

Tempestivo trattamento antimicrobico e rivalutazione

Insieme possiamo contribuire alla prevenzione della sepsi e a salvare milioni di vite ogni anno
